Title : IBM WebSphere Portal 8.5
Solution Development

Vendor : IBM

Version : DEMO

NO.1 Which options are true regarding the Portlet State Manager Service? (Choose two.)

- A. It is obtainable by using a JNDI lookup.
- B. It changes the state of the server when called.
- C. It is not a valid IBM WebSphere Portal Service.
- D. It supports portlets that are compliant with JSR 168 and JSR 286.
- E. It is obtainable by using the <portlet: state_manage r_service> tag.

Answer: B,D

NO.2 Tyler is developing a portlet that allows a user to see all the pages that the user can access in the portal. Which portal model should Tyler use to get the pages that are visible to the specific user who is logged in?

- A. Layout model
- B. Content model
- C. Navigation model
- D. Navigation Selection model

Answer: C

NO.3 Rachel has added a custom new parameter named user to the page properties of the Human Resources page.

How can Rachel retrieve this parameter?

- A. She is unable to access the user parameter.
- B. She can use the <portal-logic:pageMetaData> tag to obtain the user parameter from any page.
- C. She can use the <portal-logic:pageMetaData> tag to obtain the user parameter from the Human Resources page.
- D. She can use the <portlet-logic:pageMetaData> tag to obtain the user parameter from the Human Resources page.

Answer: C

NO.4 Kaveri needs to develop a portlet that uses Ajax Proxy to get the news feed from the URL http://www.ibm.com/developerworks/news/dw_dwtp.rss. The following configuration information is present in the proxy-config.xml:

```
<mapping contextpath="/devworks" url="http://www.ibm.com/developerworks/" />
```

Which is the correct URL to use in the Ajax call?

- A. http://myportal.com:10040/wps/devworks/news/dw_dwtp.rss
- B. http://myportal.com:10040/vps/proxy/devworks/news/dw_dwtp.rss
- C. http://myportal.com:10040/wps/proxy/http/www.ibm.com/developerworks/news/dw_dwtp.rss
- D. http://myportal.com:10040/wps/devworks/http/www.ibm.com/developerworks/news/dw_dwtp.rss

Answer: D

NO.5 Sally developed a custom theme module that requires Dojo to render it. In the custom module definition, she added the Dojo modules to the prerequisite list. Sally then added her custom module to the non-

deferred section of the

Deferred (Default) profile, leaving the Dojo modules in the deferred section.

What is the result of rendering a page in view mode with the Deferred (Default) profile assigned?

- A. The custom module is not run.
- B. The Dojo modules are promoted to non-deferred.
- C. A JavaScript error occurs, indicating that Dojo is undefined.
- D. A server-side error occurs, indicating that the Dojo modules are deferred.

Answer: B

NO.6 Jack wants to allow users to bookmark his portal page. He is using the following code:

```
<portal-navigation:urlGeneration>  
<a href=" <% wpsURL.write(out); %>"> My Page  
</a> </portal-navigation:urlGeneration>
```

What change must he make to this code to allow users to bookmark the page?

- A. The code is correct and will allow the users to bookmark the page.
- B. He must include the normalize="true" attribute to indicate that the URL to be generated should be normalized.
- C. He must include the forceAbsolute="true" attribute to indicate that the URL to be generated should be absolute.
- D. He must include the keepNavigationalState="true" attribute to indicate that the URL to be generated should keep the current navigational state, which will include all portlet modes, states, and render parameters in the URL.

Answer: D

NO.7 John, an IBM WebSphere Portal developer, is writing a portlet to help support specialists with reproducing users' issues.

Which WebSphere Portal feature can John use to run his task?

- A. Personalization
- B. People Awareness
- C. User Impersonation
- D. User and Groups Management

Answer: C

Explanation:

While impersonating the user use the "My Sites" menu in the dockbar to go to any of his sites Result:

The impersonation is lost, the site is accessed as the administrator user
